

R24 claims a life

Rustenburg – One man was killed and another injured Tuesday morning, 2 May 2017, when a car crashed head-on with a bakkie on the R24, outside Rustenburg.

In an interview with the *Platinum Weekly* newspaper, ER24 Spokesperson Russel Meiring said paramedics found the body of a man lying trapped inside the bakkie.

"Unfortunately, the man had already succumbed to his injuries. Nothing could be done for him and he was declared dead on the scene," Meiring said. The male driver of the light motor vehicle sustained minor injuries. He was treated and taken to a nearby clinic for further treatment. Local authorities are investigating.

Honde Vergiftiging, vervolg...

Na aanleiding van die voorblad berig in die *Platinum Weekly* koerant op 21 April 2017, in verband met vergiftiging van ons vierpotige vriende, het Dr TA Schouwstra van Aran Dier-ekliniek (014-592 6007) in Rustenburg ook 'n skrywe gerig met meer informasie.

"In die eerste plek is voorkoming altyd beter as genesing, dus behoort mense geadviseer te word om hul honde binne te laat slaap. Aangesien skurke gewoonlik gif oor die heinings gooi gedurende die nag, moet mens dus liefies eers jou erf in die oggend inspekteer voordat jy jou honde by die deur uitlaat vir hulle vroegoggend draaie," aldus Dr Schouwstra.

"Verskeie honde wat binne slaap het al vroeg oggend gif ingekry op die manier. Daarby is dit raadsaam om jou honde van kleins af te leer om slegs te eet as jy toestemming gee. Indien die honde erg blaf en hulle stil word daarna, kan dit aan die een kant beteken dat die persoon die perseel verlaat het en alles weer normaal is. Aan die ander kant kan dit wees dat die honde reeds gif ingeneem het en dus besig is om te sterf. Bel jou sekuriteitsfirma sodat jy kan gaan kyk of alles reg is. Moenie alleen uitgaan nie en moenie wag tot die volgende oggend nie – dit sal reeds te laat wees vir die honde.

"Sekondêr is die manier waarop die gif verwyder word van uiterste belang. Indien mense die gif in die asblik gooi, beland daardie gif op die ashoop waar baie honde daagliks snuffel vir iets

om te eet. Die rondloper honde kry die gif in en het geen kans om ooit betyds by 'n veearts uit te kom wat hulle kan behandel nie.

"Indien die gif in die riool stelsel beland wanneer mense dit in die toilet afspoel, is daar weereens verskeie diere of voëls wat op rioolplase voorkom wat die gif kan inkry. Neem dus die gif saam na die veearts vir veilige verwydering.

"Die opgooisel van die honde moet op dieselfde manier hanteer word aangesien die inname van die opgooisel sekondêre vergiftiging tot gevolg kan hê. Alle honde op die perseel moet dus van die area verwyder word tot alles na behore skoon gemaak is.

"Honde wat vergiftig is, kan geaktiveerde koolstof ingegee word. Geaktiveerde koolstof help om te keer dat die gif geabsorbeer word vanuit die dermkanaal en gee die eienaar bietjie meer tyd om by die veeartse uit te kom. Die geaktiveerde koolstof is beskikbaar by veeartse.
