And we Survived...

SELLY PARK PRIMARY EDUCATORS GO UNDERGROUND

Rustenburg – Text books are not always up to date, as Natural Science lessons on mining recently revealed. To familiarise themselves with current mining practices and gain firsthand knowledge of the subject, 10 Educators from Selly Park Convent Primary School went underground at Khuseleka Mine. After a meeting at the RPM Recreation Club, being treated to early morning refreshments and watching an introductory DVD, Educators were then taken to the mine where they changed into protective clothing... Even that was an experience on its own! A guided tour around the shaft surface was followed by a safety talk, ride in the cage and chair lift to Me-

rensky Section 234. Next it was an arduous walk to the work place, 26/26 1E panel, with Mr Shane Forbes, Mine Overseer, explaining procedures and operations. Selly Park Primary would like to thank Mr Lucky Mnsi and Mr Johan Jooste of Khuseleka Mine for allowing this exceptional visit! We also thank Mr Shane Forbes, as well as all others involved in this tour for sharing their expertise on the day, thus ensuring an informative and exciting visit. Lessons on mining practices can now be delivered to learners in the classrooms with confidence.

Left: Mrs. Scholar Chitiyo, Grade 4 Educator, operates a rock drill at the work place, 26/26 1E panel

Right: Getting to grips with the chair lift is Grade 4 Educator, Miss Marianne Barlow.

Getting a thumbs up from Johan Jooste, Section Manager, and Shane Forbes, Mine Overseer, on their return to surface are Selly Park Primary Educators Hannelie Hamilton, Dauwline Kruger, Melissa Anderson-Fourithis, Gerda Combrink, Lenah Masuku, Lerato Modisane, Marianne Barlow, Scholar Chitiyo, Joyce Mabuela and Sister Surprise

Closing date: 29 July 2011

The Boshhoek smelter complex, situated approximately 21km north-west of Rustenburg in the North West Province, forms part of the Xstrata-Merafe Chrome Venture. The following key opportunity is now available for a career-minded individual:

Maintenance Engineer

Sinter Plant

The incumbent will ensure contribution towards maintenance management, project execution and adherence to sustainable development standards in order for the Sinter plant to achieve budgeted production.

Responsibilities: In this role, the successful candidate will be responsible for day-to-day maintenance of the Sinter plant, controlling the monthly budget and executing projects. He/she will also follow up on inspection routines, do proactive shutdown planning and keep SD file updated and audited. Ensuring 95% plant availability within budgeted costs will also be the incumbent's responsibility.

Requirements: We seek a team worker with a Mechanical/Electrical (Heavy Current) Engineering degree/diploma. Heavy industry experience will be advantageous. Computer literacy, leadership and good communication skills are also needed. He/she must be medically fit for this position. (Ref. 12753)

Please note: Xstrata-Merafe Boshhoek is committed to operating sound Sustainable Development (SD) practices and strives towards leadership in these areas.

Applicants must take note that general sustainable development requirements and adherence to all sustainable development policies and procedures will be expected of them.

Xstrata-Merafe Boshhoek is an equal opportunity employer and in making the final selection, consideration will be given, but not limited, to achieving Xstrata-Merafe Resources' Employment Equity objectives.

Selection procedure: Short-listed candidates will be expected to attend a panel interview, and appointment will be subject to reference checks.
