**TRAUMA RESCUE** EMERGENCY MEDICAL CARE  
ER24  
0861 789 911  
**REAL HELP, REAL FAST**

**Rustenburg** – With summer around the corner, Trauma Rescue EMS urges parents to take extra pre-caution with their children around pools, Jacuzzi's, fish ponds, buckets of water etc. Water can be dangerous for kids if you don't take the proper precautions. Many kids die each year by drowning and most drownings occur mostly in home swimming pools. It is the second leading cause of accidental death for people between the ages of 5 and 24.

The good news is there are many ways to keep your kids safe in the water and make sure that they take the right precautions when they're on their own. Parents should not be fooled into thinking that their child is safe just because he/she knows how to swim. In a lot of these cases accidents occur even though the child knew how to swim.

1. Never allow your youngster to swim alone without any adult supervision. It is quite common to develop a cramp underwater, or for accidents like hitting your head while diving for example, to occur. It is paramount that there should be persons around to help in such situations.
2. Do not allow children with no knowledge of swimming in or around the pool. For good pool safety, make sure that all kids attend a certified swimming class, or at least learn basic flotation techniques and life saving techniques in case of accidents.
3. Enclose your pool with high fences, and make it totally inaccessible for children. Install a fence or other barrier, such as a wall, completely around the pool. If the house is part of the barrier, the doors leading from the house to the pool should be protected with an alarm or the pool should have a pow-

er safety cover. The fence or other barrier should be at least 4 feet high. It should have no foot- or handholds that could help a young child to climb it. Young children are especially vulnerable — they can drown in less than 2 inches (5 centimetres) of water. That means drowning can happen where you'd least expect it — the sink, the toilet bowl, fountains, buckets, inflatable pools, or small bodies of standing water around your home, such as ditches filled with rainwater. Always watch children closely when they're in or near any water.

**Knowing First Aid can save lives and all parents should consider taking CPR and First Aid Classes. Don't hesitate – call us today to book your class! Enjoy summer! Remember – If you swim alone, you die alone! Regards Trauma Rescue Paramedic's (0861 789 911)**

## Serious Accident - Sun City Road

**Rustenburg** – Two people sustained serious head injuries after they were flung from the Ford Ranger bakkie they were travelling in, on the Sun City road near Sundown Ranch. The accident occurred on September 4 at around 06h20.

According to police investigations, the two occupants are suspected of not wearing their safety belts at the time of the accident. No other vehicles were involved and it is supposed that the driver lost control over the vehicle before the bakkie rolled a couple of times.

What's more, the two men were stranded at the scene for an unknown amount of time. An emergency call was made to emergency personnel by a driver passing by. It is alleged that the two men were called out to work the previous night, and did not show up at work.

When emergency personnel arrived on scene, they had to intubate both on scene... "They were hanging onto their lives by a thread." one of the paramedics said. Both were taken to the Moses Kotane provincial hospital for treatment and observation.
