Closing date: 25 November 2011

Wonderkop, a ferro-alloy plant, part of Xstrata Alloys, the world's largest producer of ferrochrome, is situated ± 20 km from Rustenburg near Marikana in the North West. Dynamic individuals are required for the following positions:

Artisan Fitter

Responsibilities: The incumbent will be responsible for maintaining and repairing plant equipment, as well as installing new equipment. He/she will provide a proactive maintenance service that includes fault-finding, troubleshooting and root cause analysis of equipment breakdowns to maintain plant availability and operational stability, in accordance with required standards. Planned maintenance, schedules and shutdowns will also be his/her responsibility and it may be expected of him/her to act in a higher position when so required. Overtime, standby and shift work will form part of the role, thus own transport is essential.

Artisan Boilermaker

Responsibilities: The incumbent will be required to monitor and report faulty components, plan and prepare resources for scheduled maintenance and manufacture/install components. Further functions include assisting in the monitoring and rectification of sub-standard conditions, checking the safety devices and guards on all equipment and machinery and scheduling daily work.

Artisan Rigger

Responsibilities: The incumbent will be required to receive job cards for repairs or breakdowns and repair faults as directed. The successful candidate will be responsible for obtaining work permits, isolating equipment where necessary as well as housekeeping, signing off of job cards and work permits.

Requirements for all positions: Applicants must be in possession of a Grade 12, N2 and a relevant Trade Test from a reputable institution. This must be supported by a minimum of 2 years' post-trade test plant experience in a heavy industry environment. Advanced knowledge of sustainable development aspects, proficiency in English and communication skills are essential. Knowledge of accident/incident investigation as well as basic health and safety is vital, whilst knowledge of SAP maintenance would be an advantage. The roles demand the ability to work under pressure and independently, adaptability and attention to detail. The successful candidates must be medically fit for the positions.

Please note: Xstrata is committed to operating sound Sustainable Development (SD) practices and strives towards leadership in these areas.

Applicants must take note that general SD requirements apply and that adherence to SD rules will be expected of them.

In the event that you have not heard from the Company within a period of 21 days after the closing date for applications, your application should be deemed unsuccessful. The CVs of unsuccessful applicants will not be returned.
