#ONSDORP-VELDTOG: RUSTENBURG-TAK VUL SLAGGATE

Rustenburg - AfriForum se Rustenburg-tak het die afgelope twee naweke meer as 4 ton teer gebruik om slaggate in dié stad as deel van AfriForum se #OnsDorp-veldtog te herstel.

AfriForum-lede en vrywilligers van Rustenburg het slaggate in Marais straat en Thabo Mbeki rylaan gevul. Die Rustenburg-tak het vanjaar al meer as 16 ton teer aangekoop om slaggate te vul.

"Die herstel van slaggate is vir ons 'n prioriteit en ons wil inwoners en skole wat soortgelyke probleme ervaar, aanmoedig om hul plaaslike AfriForum-tak te kontak," aldus Sampie Steinberg, AfriForum se assistentkoördineerder vir Marico.

"Die tak sal soortgelyke volhoubare selfdoenprojekte aanpak. Wanneer ons as 'n gemeenskap saamwerk om probleme uit die weg te ruim, sal ons nog baie sukses behaal," sê Chris Trytsman, voorsitter van AfriForum se Rustenburg-tak.

AfriForum doen 'n beroep op die Rustenburg-inwoners om by hul plaaslike tak in te skakel en sodoende 'n wesenlike verskil in die gemeenskap te maak. AfriForum mediaverklaring, 14 Oktober 2019

SUPPORTING A LOCAL YOUTH WITH A **LEARNERSHIP AND** TRAINING MEANS A BETTER JOB FOR HIM. AND A BETTER LIFE FOR HIS FAMILY.

When Elias Thage from Bapong in the North West Province, the first graduate in his family, starts his journey with Giencore on a learnership programme, he works hard Which means Elias continues to benefit from the ongoing training opportunities available to Glencore employees, and he qualifies as a Senior Instrument Technician at Rustenburg Smelter. His hunger for success means that today, he is able to take care of his mother and give back to the community he's from. It also means that Elias will soon fulfill his ambition to mentor other young people.

Elias is just one of almost 27,000 people we employ, including contractors, experienced professionals and recent graduates, all of whom benefit from Glencore's employment and skills training initiatives. We believe that a single act can make a difference. It creates a ripple effect that can be felt throughout families and communities.

PROGRESS. TOGETHER. www.glencore.com/southafrica **GLENCORE**

p 09 **20.08 CARAT TYPE IIB BLUE DIAMOND RECOVERED**

Cullinan - Petra Diamonds Limited has recovered an exceptional 20.08 carat blue gem quality Type IIb diamond from its Cullinan Diamond Mine. The discovery, on 23 September, not only demonstrates

the quality of Petra's asset base as the Cullinan diamond mine remains a significant source of rare blue diamonds, but it again confirms the prevalence of exceptional stones in the Cullinan orebody as well as the ability of the mine's plant to recover the full spectrum of diamonds.

Petra Diamonds Limited press release, 23 September 2019

MOVING DIAMOND WITHIN A DIAMOND

Siberia - Humans have been mining diamonds for a long time, but a new stone hauled from the belly of the Earth could very well be a first. The diamond itself is hollow – and inside is another diamond, freely moving around.

It was discovered in a Russian mine in Siberia, and has been named the Matryoshka Diamond, after the Russian nesting matryoshka dolls.

Inclusions and flaws in diamonds are extremely common; in fact, most diamonds have some form of flaw, or piece of mineral trapped inside. It's not a bad thing - in fact, we've gained access to some exceptional minerals from deep within the earth because it was trapped in diamonds as they form.

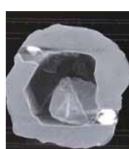

But a diamond in a diamond? That, according to Russian diamond mining group ALROSA, is a new one. The *Matryoshka Diamond* is not a huge stone just 0.62 carats (0.124 grams), with maximum dimensions of 4.8 x 4.9 x 2.8 millimetres. The inner diamond is even tinier -

0.02 carats (0.004 grams), measuring just 1.9 x 2.1 x 0.6 millimetres.

Sharp eyes detected something unusual about the stone during the sorting process, and it was sent to ALROSA's research and development geological enterprise for assessment. There, scientists subjected the diamond to Raman and infrared spectroscopies, and microtomography.

They also estimate that the diamond may be over 800 million years old, although that is yet to be verified. Because it's such a rare find, the company has yet to estimate its worth.
