Rustenburg – Thousands of chickens died on the N4 on 21 April before they reached the kill blade. In fact, according to an anonymous farmer, these deaths are considered 'part of doing business'.

Chickens also die like flies due to unnatural growth, harsh living conditions, sudden death syndrome, and death during transport. The poultry business is unforgiving even in the care of the most compassionate farmer.

The truck which transported the chickens in large containers overturned shortly after entering the N4 from the R24 off-ramp. Training inspector at National Society for the Prevention of Cruelty to Animals (NSPCA) in

Rustenburg Gena Labuschagne spoke to Platinum Weekly about the accident which occurred at around 14:00. "The truck carried about 11,000 chickens and the number of birds that died ran into the thousands," Labuschagne said.

The accident caused heavy traffic delays as police and public safety personnel worked tirelessly to contain the situation. Group corporate affairs director at RCL Foods, Stephen Heath, expressed his concern about the accident. "An investigation is underway and details about the accident will be made available when that process has been completed."

Working for Water leaves behind a fire hazard

(Letter to the editor)

Rustenburg - Working for Water contractors have been cutting alien invasive plants along the Dorpsruit since October 2020. The piles of dry reeds have already been subjected to one fire, but there is still a risk that another one will start as there is still a lot of dry material left.

In light of the tragedies that have unfolded in the Cape and Gauteng, fire risk should be taken seriously by the Rustenburg Local Municipality. The Working for Water contractor should be asked to remove the reeds as they are close to people's homes.

Furthermore, the new reed growth visible in the photo shows that the reeds were not poisoned after they had been cut. This means that next year there will be even more biomass to add to the fuel load, so there will be a greater fire risk.

Working for Water has not poisoned or removed the reeds cut which is creating a greater fire risk for the Geelhout park ext 6 area. Residents that could be affected by fires originating in this poorly managed green corridor should keep a record of this article and any correspondence and reference numbers in case they need to claim for fire damage to their property.

Crime hotspots identified

Rustenburg - The bonds between Rustenburg's Community Policing Forums (CPFs), SAPS and the Department of Public Safety is watertight. They have one goal - serving the community of Rustenburg and keeping us safe. On Thursday 15 April, representatives from each of the units gathered to discuss crime hotspots in the CPF 5 area. "The current hotspots identified are Modderfontein, Boschfontein, and Rhenosterfontein," EXCO CPF Rustenburg acting vice chairman Jean Keyser said. "Electricity outages play a significant role, but we are consulting with Rustenburg Local Municipality." SANRAL has also committed to fix the faulty streetlights along the R24.

"Hijackings are also a major concern along the R24. DO NOT STOP for any reason," Jean added. "Also, when you report a crime to SAPS, get the SAPS representative's name and the time you phoned. This information assists greatly when we put heads together with the station commander.'

Strict COVID-19 voting regulations

SA – President Cyril Ramaphosa announced that this year's local government elections will be held on Wednesday 27 October.

The announcement comes after South Africa held its first by-elections under COVID-19 protocols on Wednesday 21 April - a development that cast a shadow on the ability of the Independent Electoral Commission (IEC) to adhere to constitutional obligations during the global pandemic. Polls were held in 15 municipal wards across seven provinces on Wednesday 21 April.

The local government elections - which will be held for the sixth time under South Africa's democratic dispensation - will be one of the major events on the country's political calendar.

'Magalies Water has capacity to run Koster Plants'

Magalies Water press release extracts, 15 April 2021

Magalies Water has noted recent media reports which have created an impression that Magalies Water is unable to conduct its duties as mandated by the North West province and in accordance with the Operations and Maintenance Agreement between itself and the Kgetlengriver Local Municipality for the Koster Water Treatment Works, Koster Wastewater Treatment Works, and Swartruggens Water Treatment Works.

"Magalies Water would like to reject the suggestion as false and without factual basis as we have the capacity to operate and maintain the facilities," said Sandile Mkhize, CEO of Magalies Water. Since the day Magalies Water was refused access to the plants, no water quality analysis has been conducted for the produced water, as per the minimum requirement by the SANS 241 drinking water standards.

To date, Magalies Water has not been informed and made aware of any raw sewage spilling into the Koster River and as such, has not been in a position to address any such issue.

Magalies Water has assembled a dedicated team of specialists, technicians and plant operators from the water and wastewater and engineering units who have the necessary expertise. Under the leadership of Sandile Ngcobo, area manager at Magalies Water, the team will ensure that the operation and maintenance of both water and wastewater infrastructure at KRLM is implemented successfully.

Koster/ Swartruggens – A true victory for human rights!... The Kgetlengrivier Local Municipality (KLM) had to acknowledge the sovereignty of the Mahikeng High Court. Koster and Swartruggens residents were granted the power by the court to take over the management of the Kgetlengrivier Local Municipality's (KLM) water services as from Thursday 7 January.

For several years, residents had to deal with contaminated water stemming from raw sewage flowing into the Koster and Elands river. The contaminated water, with an Ecoli count of more than 4,000 times the allowed amount, was then supplied to residents to use - often as drinking water.

The court order also stated that Bojanala Local Municipality and KLM are in breach of their constitutional obligations of providing potable water sustainably.

"Residents of the KLM could no longer just sit back and hope that everything will be fixed. They knew something drastic had to be done. We assembled a great team of people to work on this and thanks to their determination, we were successful," said Andreas Peens, the attorney for the Kgetlengrivier residents.

After receiving complaints about contaminated water in Swartruggens, the team worked tirelessly on 18 February to bleed for clean water. One drop in the bucket... this is just one of the actions undertaken. "We are now in the process of cleaning the clarifying system. It looks like it hasn't been cleaned in years," said Andreas Peens, attorney for the Kgetlengrivier residents.

RRTStakeholders meet

Rustenburg – The Rustenburg Rapid Transport (RRT) system will be launched before the end of the current municipal financial year, which ends mid-2021.

This was announced by executive mayor of Rustenburg councillor Mpho Khunou while briefing stakeholders including the MEC for the Department of Community Safety and Transport Management Sello Lehari, at the Rustenburg Civic Centre on 12 April.

"A total of 45 buses are being procured and the project will include up to 150 taxis as part of the project," Khunou said. As part of the industry's assimilation into the project, RRT bus and taxi drivers are currently being trained ahead of the launch.

"The project is likely to change the face of the city and we appreciate the inclusiveness of the taxi industry," MEC Lehari said. "Henceforth, we must have regular meetings, especially with the taxi industry to ensure that all stakeholders are on board."

They decide what you need to know

[Letter to the editor]

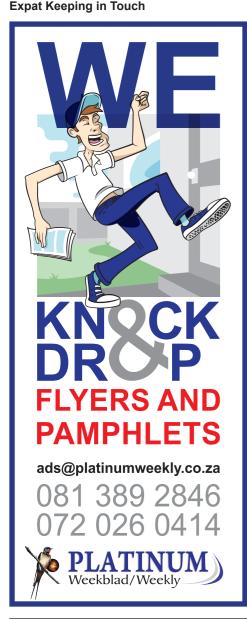

For months on end, there has been a lot of talk about how Google manipulate data available on their search engine, and that they plan to phase out advertising cookies which will force advertisers to buy ad space through them.

The UK's Daily Mail has put their money where their mouth is, and filed an antitrust lawsuit against Google over search engine censorship. The Daily Mail deserve to be one of the most popular news websites in the world.

Google will think twice before smearing and blacklisting them as conspiracy theorists or propagandists. It has been proven without a doubt that... you get different web results to the same search, depending on the country you are in. The results are also manipulated considering Google's agenda and political views.

So, you thought you had freedom of speech and freedom of access to information... you might have freedom of speech, but not the latter...

They will decide what you need to know and what not. They also influence your right of having an opinion, because even if you are lucky enough that they don't block you, you will only appear in search results where and if they allow it. Three hoorays for Daily Mail!

1"Most assuredly, I say to you, he who does not enter the sheepfold by the door, but climbs up some other way, the same is a thief and a robber. ²But he who enters by the door is the shepherd of the sheep. ³To him the doorkeeper opens, and the sheep hear his voice; and he calls his own sheep by name and leads them out. ⁴And when he brings out his own sheep, he goes before them; and the sheep follow him, for they know his voice. 5Yet they will by no means follow a stranger, but will flee from him, for they do not know the voice of strangers." ⁶Jesus used this illustration, but they did not understand the things which He spoke to them. 7Then Jesus said to them again, "Most assuredly, I say to you, I am the door of the sheep. 8All who ever came before Me are thieves and robbers, but the sheep did not hear them. 9I am the door. Young athletes show promise

Phokeng/ Rustenburg - Three athletes from Lebone II College of the Royal Bafokeng - Temoso Masikane, Khutsisa Rampete, and Tumisang Rantjie - did their school and community proud during the Athletics South Africa (ASA) Track and Field Age Group Championships. The three athletes were representing the North West province during the championships, which took place from 7 to 10 April in Cape Town. Masikane's phenomenal performance in the u/16 high jump left everyone stunned. The 15-yearold's 2.00m jump secured him the gold medal and proved his potential to become one of the country's top athletes. His effort was just 0.05 meters shy of the national record for his age group, and he followed this up by also winning the u/16 long jump event.

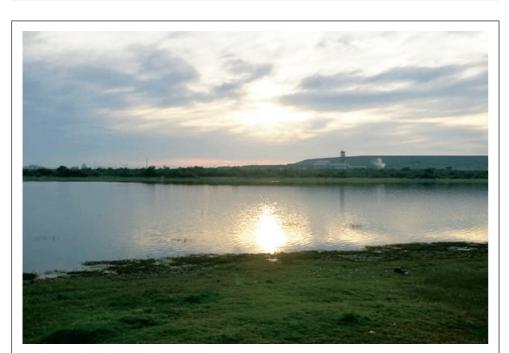

Rampete participated in the u/18 100m and the 4x100m relay events while Rantjie took part in the u/18 long jump event. Both athletes also performed well.

ARE ACHING JOINTS MAKING LIFE A PAIN?

If you've ever experienced a strained or sprained joint you'll know how even short-term pain and swelling in the joints can interfere with movement and affect your quality of life. As we age, painful joints become more common and for many inflamed, sore joints is a chronic ongoing condition.

Many conditions can lead to painful joints, from strains and sprains to osteoarthritis, rheumatoid arthritis, bursitis, gout and injuries. Lower back pain is most commonly reported, followed by knee, shoulder and hip pain.

Joints form the connections between our bones, providing support and enabling movement. The mineral sulphur is a key component in the formation of healthy body. tissue, bones, joints, ligaments and tendons. It has been shown that people who suffer from chronic pain benefit by increasing their sulphur intake. While sulphur occurs in a wide variety of foods, today's diets are deficient in sulphur and so supplementation is required. That's where THRESHHold® can help.

THRESHHold® tablets is a nutritional supplement that contains organically bonded sulphur Methylsulphonylmethane (MSM).

THRESHHold® Real MSM is highly effective at relieving inflammation and pain arising from inflamed joints and helping to preserve joint function, especially amongst sports people or those with arthritis, fibromyalgia, rheumatism and gout.

MSM, is the purest distilled MSM which is clinically proven to relieve pain and reduce inflammation.

Available from pharmacies: and health shops. www.threshhold.co.za
